DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 and 19-27, drawn to a method/apparatus for converting an interlace scan video image to a progressive scan video image, classified in class 348, subclass 441.
 - II. Claims 13-18 and 28-31, drawn to a method/apparatus for converting an interlace scan video image which exhibits frame-to-frame motion to a progressive scan video image, classified in class 348, subclass 448.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as converting an interlace scan video image to a progressive scan video image and does not require the capabilities of determining a degree of movement in a region of a target picture element (pixel) position between a last displayed image and a current image, combining the intra-field interpolated pixel value and the inter-field interpolated pixel value in a proportion determined by the degree of movement in the region to produce an output interpolated pixel value for the progressive scan video image, and determining respective minimum, maximum and median values for respective sets of pixel values, each set of pixel values including respective pixel values for pixel positions vertically adjacent to the target pixel position in the interlace scan image and the sets

including respective pixel positions from a previous frame that include the target pixel position and pixel positions horizontally adjacent to the target pixel position of invention II for patentability. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
